TENDER DOCUMENT

KAR/ELEC/2026/057

Supply and installation of electrical works at Karoo Heights Sports Complex

Employer: Karoo Heights Municipality

Synthetic test document - fictional data

Part C1: Tender notice and conditions

Parking for site vehicles is available at the rear of the property near the service entrance. The community committee reports that the building is busiest on weekday evenings and on Saturdays. Materials for the project are available from suppliers in the district and from the nearest regional centre.

The kitchen, ablution blocks and storeroom are located on the eastern side of the building. Karoo Heights Sports Complex is a single-storey brick building constructed in 1987 and extended in 2004. The tender documents consist of the invitation, the conditions of tender, the scope of work and the pricing schedule. A previous renovation replaced the plumbing and the ceiling in the main hall.

The roof is covered with fibre cement sheeting supported on steel trusses. The scope of work covers the main hall, the offices, the passages and the external areas. The existing electrical installation consists of a main board in the plant room and three sub boards. Drawings of the existing layout have been prepared by the employer's agent and are available for inspection. Materials for the project are available from suppliers in the district and from the nearest regional centre.

The existing electrical installation consists of a main board in the plant room and three sub boards. Parking for site vehicles is available at the rear of the property near the service entrance. The employer's agent has prepared the specifications in accordance with standard industry practice. The municipality has operated the facility since 1996 and the local committee manages bookings.

The building is located in Karoo and is used throughout the week by community groups. Drawings of the existing layout have been prepared by the employer's agent and are available for inspection. Tenderers must submit a valid tax compliance status pin issued by the South African Revenue Service. The site is fenced and has a single vehicle gate on the northern boundary. The main hall seats about two hundred people and the adjoining rooms are used as classrooms and offices.

The scope of work covers the main hall, the offices, the passages and the external areas. The tender documents consist of the invitation, the conditions of tender, the scope of work and the pricing schedule. Part C3 describes the extent of the works and the standard of workmanship expected in general terms.

Materials for the project are available from suppliers in the district and from the nearest regional centre. Karoo Heights Sports Complex is a single-storey brick building constructed in 1987 and extended in 2004. The community committee reports that the building is busiest on weekday evenings and on Saturdays.

The municipality has operated the facility since 1996 and the local committee manages bookings. The external areas include a paved forecourt, a small garden and a covered walkway. The community committee reports that the building is busiest on weekday evenings and on Saturdays.

Parking for site vehicles is available at the rear of the property near the service entrance. The community committee reports that the building is busiest on weekday evenings and on Saturdays. The kitchen, ablution blocks and storeroom are located on the eastern side of the building.

Drawings of the existing layout have been prepared by the employer's agent and are available for inspection. The community committee reports that the building is busiest on weekday evenings and on Saturdays. The building is located in Karoo and is used throughout the week by community groups.

The surrounding properties are residential and the nearest shop is a few hundred metres away. The existing electrical installation consists of a main board in the plant room and three sub boards. The area has a mild climate and rainfall is mostly in the summer months. The roof is covered with fibre cement sheeting supported on steel trusses. Karoo Heights Sports Complex is a single-storey brick building constructed in 1987 and extended in 2004.

The surrounding properties are residential and the nearest shop is a few hundred metres away. Karoo Heights Sports Complex is a single-storey brick building constructed in 1987 and extended in 2004. The roof is covered with fibre cement sheeting supported on steel trusses. Materials for the project are available from suppliers in the district and from the nearest regional centre. Parking for site vehicles is available at the rear of the property near the service entrance.

The tender documents consist of the invitation, the conditions of tender, the scope of work and the pricing schedule. The scope of work covers the main hall, the offices, the passages and the external areas. The community committee reports that the building is busiest on weekday evenings and on Saturdays.

Part C2: Pricing data - Bill of Quantities

Rates and amounts are to be completed by the tenderer.

Item	Description	Unit	Qty	Rate	Amount
SECTION: PRELIMINARIES AND GENERAL					
1.1	Health and safety plan and file	sum	1		
1.2	Provisional sum for builder's work in connection with electrical installation	Sum	1	R 22 248.00	
SECTION: DISTRIBUTION BOARDS					
2.1	Miniature circuit breaker, 1-pole, 20 A, 6 kA	Nr			
2.2	Miniature circuit breaker, 1-pole, 32 A, 6 kA	No.			
2.3	Miniature circuit breaker, 3-pole, 63 A, 10 kA	each	17		
2.4	Earth leakage unit, 63 A, 30 mA	each			
2.5	Surge protection device, type 2, 3-phase	each			
SECTION: CONTAINMENT					
3.1	PVC trunking, 100 x 50 mm (rate only)	mtr			
SECTION: CABLES					
4.1	2-core 4 mm2 PVC insulated copper cable, installed in conduit	mtr	771.00		
4.2	2-core 16 mm2 PVC insulated copper cable, installed in conduit	Metre	559.00		
4.3	3-core 2.5 mm2 PVC insulated copper cable, installed in conduit	mtr	965.00		
4.4	3-core 4 mm2 PVC insulated copper cable, installed in conduit	m			
4.5	3-core 6 mm2 PVC insulated copper cable, installed in conduit (rate only)	m			
4.6	3-core 16 mm2 PVC insulated copper cable, installed in conduit	m	1177		
4.7	4-core 4 mm2 PVC insulated copper cable, installed in conduit (rate only)	mtr			
4.8	4-core 6 mm2 PVC insulated copper cable, installed in conduit	mtr	681.00		
4.9	4-core 10 mm2 PVC insulated copper cable, installed in conduit (rate only)	Metre			
4.10	4-core 16 mm2 PVC insulated copper cable, installed in conduit	Metre	651.00		
SECTION: LIGHTING					
5.1	LED panel luminaire, 600 x 600 mm, 36 W, recessed	no	89		
5.2	LED batten luminaire, 1200 mm, 36 W	each	89		
SECTION: SMALL POWER					
6.1	Single switched socket outlet, 16 A	No.	54		
SECTION: EARTHING AND TESTING					
7.1	Earth rod, copper clad, 1.5 m	no			

Item	Description	Unit	Qty	Rate	Amount
7.2	Bare copper earth conductor, 16 mm2	m	196.00		
7.3	As-built drawings and operating manuals	item	1
