TENDER DOCUMENT

GRE/ELEC/2026/057

Supply and installation of electrical works at Greenvale Community Hall

Employer: Greenvale Municipality

Synthetic test document - fictional data

Part C1: Tender notice and conditions

The surrounding properties are residential and the nearest shop is a few hundred metres away. The employer's agent has prepared the specifications in accordance with standard industry practice. Existing luminaires in the hall are fluorescent fittings that have reached the end of their service life. Materials for the project are available from suppliers in the district and from the nearest regional centre.

The building is located in Greenvale and is used throughout the week by community groups. A previous renovation replaced the plumbing and the ceiling in the main hall. Existing luminaires in the hall are fluorescent fittings that have reached the end of their service life.

3.5 Tenderers must complete the declaration of interest and the declaration of past supply chain management practices.

The scope of work covers the main hall, the offices, the passages and the external areas. A previous renovation replaced the plumbing and the ceiling in the main hall. The kitchen, ablution blocks and storeroom are located on the eastern side of the building.

The agreement shall be governed by the laws of the Republic of South Africa. The existing electrical installation consists of a main board in the plant room and three sub boards. Existing luminaires in the hall are fluorescent fittings that have reached the end of their service life.

The building is located in Greenvale and is used throughout the week by community groups. The roof is covered with fibre cement sheeting supported on steel trusses. Existing luminaires in the hall are fluorescent fittings that have reached the end of their service life. Most of the existing wiring is concealed in the ceiling void and the roof space is accessible through two hatches.

The area has a mild climate and rainfall is mostly in the summer months. Electricity is supplied through a metered connection from the municipal network. Parking for site vehicles is available at the rear of the property near the service entrance. The municipality has operated the facility since 1996 and the local committee manages bookings. The surrounding properties are residential and the nearest shop is a few hundred metres away.

Existing luminaires in the hall are fluorescent fittings that have reached the end of their service life. The roof is covered with fibre cement sheeting supported on steel trusses. The building is located in Greenvale and is used throughout the week by community groups. The tender documents consist of the invitation, the conditions of tender, the scope of work and the pricing schedule. The area has a mild climate and rainfall is mostly in the summer months.

The employer's agent has prepared the specifications in accordance with standard industry practice. Existing luminaires in the hall are fluorescent fittings that have reached the end of their service life. The main hall seats about two hundred people and the adjoining rooms are used as classrooms and offices.

The main hall seats about two hundred people and the adjoining rooms are used as classrooms and offices. The building is located in Greenvale and is used throughout the week by community groups. The external areas include a paved forecourt, a small garden and a covered walkway. Materials for the project are available from suppliers in the district and from the nearest regional centre. The site is fenced and has a single vehicle gate on the northern boundary.

The community committee reports that the building is busiest on weekday evenings and on Saturdays. The employer's agent has prepared the specifications in accordance with standard industry practice. A previous renovation replaced the plumbing and the ceiling in the main hall. Existing luminaires in the hall are fluorescent fittings that have reached the end of their service life. Part C3 describes the extent of the works and the standard of workmanship expected in general terms.
