TENDER DOCUMENT

GRE/ELEC/2026/091

Supply and installation of electrical works at Greenvale Community Hall

Employer: Greenvale Municipality

Synthetic test document - fictional data

Part C1: Tender notice and conditions

The main hall seats about two hundred people and the adjoining rooms are used as classrooms and offices. The area has a mild climate and rainfall is mostly in the summer months. The tender documents consist of the invitation, the conditions of tender, the scope of work and the pricing schedule. Part C3 describes the extent of the works and the standard of workmanship expected in general terms.

The community committee reports that the building is busiest on weekday evenings and on Saturdays. The municipality has operated the facility since 1996 and the local committee manages bookings. The employer's agent has prepared the specifications in accordance with standard industry practice.

Materials for the project are available from suppliers in the district and from the nearest regional centre. The main hall seats about two hundred people and the adjoining rooms are used as classrooms and offices. Greenvale Community Hall is a single-storey brick building constructed in 1987 and extended in 2004. The surrounding properties are residential and the nearest shop is a few hundred metres away.

Materials for the project are available from suppliers in the district and from the nearest regional centre. Electricity is supplied through a metered connection from the municipal network. The roof is covered with fibre cement sheeting supported on steel trusses.

The kitchen, ablution blocks and storeroom are located on the eastern side of the building. Existing luminaires in the hall are fluorescent fittings that have reached the end of their service life. The area has a mild climate and rainfall is mostly in the summer months.

The roof is covered with fibre cement sheeting supported on steel trusses. The external areas include a paved forecourt, a small garden and a covered walkway. The main hall seats about two hundred people and the adjoining rooms are used as classrooms and offices. Part C3 describes the extent of the works and the standard of workmanship expected in general terms.

The main hall seats about two hundred people and the adjoining rooms are used as classrooms and offices. The works are located on erf 1042 and the title deed is held by the municipality. The site is fenced and has a single vehicle gate on the northern boundary. The employer's agent has prepared the specifications in accordance with standard industry practice. Electricity is supplied through a metered connection from the municipal network.

The main hall seats about two hundred people and the adjoining rooms are used as classrooms and offices. The area has a mild climate and rainfall is mostly in the summer months. Parking for site vehicles is available at the rear of the property near the service entrance.

The surrounding properties are residential and the nearest shop is a few hundred metres away. The kitchen, ablution blocks and storeroom are located on the eastern side of the building. The existing electrical installation consists of a main board in the plant room and three sub boards.

The employer shall appoint a project manager who will act as the employer's representative during the contract. The external areas include a paved forecourt, a small garden and a covered walkway. The kitchen, ablution blocks and storeroom are located on the eastern side of the building.

The surrounding properties are residential and the nearest shop is a few hundred metres away. The site is fenced and has a single vehicle gate on the northern boundary. Most of the existing wiring is concealed in the ceiling void and the roof space is accessible through two hatches.

A previous renovation replaced the plumbing and the ceiling in the main hall. The surrounding properties are residential and the nearest shop is a few hundred metres away. The building is located in Greenvale and is used throughout the week by community groups.

The works are located on erf 1042 and the title deed is held by the municipality. The tender documents consist of the invitation, the conditions of tender, the scope of work and the pricing schedule. The external areas include a paved forecourt, a small garden and a covered walkway. The existing electrical installation consists of a main board in the plant room and three sub boards. The roof is covered with fibre cement sheeting supported on steel trusses.

Part C3 describes the extent of the works and the standard of workmanship expected in general terms. The scope of work covers the main hall, the offices, the passages and the external areas. A previous renovation replaced the plumbing and the ceiling in the main hall. Parking for site vehicles is available at the rear of the property near the service entrance.

Site hours of the facility are from 08:00 to 22:00 on weekdays and the caretaker locks the gates at 22:30. Existing luminaires in the hall are fluorescent fittings that have reached the end of their service life. The building is located in Greenvale and is used throughout the week by community groups.

The external areas include a paved forecourt, a small garden and a covered walkway. The tender documents consist of the invitation, the conditions of tender, the scope of work and the pricing schedule. The roof is covered with fibre cement sheeting supported on steel trusses. The works are located on erf 1042 and the title deed is held by the municipality.

3.2 Only tenderers registered with the Construction Industry Development Board with a contractor grading of 6EP or higher in the electrical engineering works category may submit tenders.

Part C2: Pricing data - Bill of Quantities

Rates and amounts are to be completed by the tenderer.

Item	Description	Unit	Qty	Rate	Amount
SECTION: PRELIMINARIES AND GENERAL					
A1	Health and safety plan and file	sum	1		
SECTION: DISTRIBUTION BOARDS					
B1	Main distribution board, 400 A, 3-phase, wall mounted, with busbars	no	2		
SECTION: CONTAINMENT					
C1	PVC trunking, 100 x 50 mm	m	118		
SECTION: CABLES					
D1	2-core 2.5 mm2 PVC insulated copper cable, installed in conduit	m	1071		
D2	2-core 4 mm2 PVC insulated copper cable, installed in conduit	m	1091		
D3	2-core 10 mm2 PVC insulated copper cable, installed in conduit	m	506		
D4	3-core 2.5 mm2 PVC insulated copper cable, installed in conduit	m	1155		
D5	3-core 10 mm2 PVC insulated copper cable, installed in conduit	m	198		
D6	4-core 2.5 mm2 PVC insulated copper cable, installed in conduit	m	1071		
D7	4-core 4 mm2 PVC insulated copper cable, installed in conduit	m	347		
SECTION: LIGHTING					
E1	LED batten luminaire, 1200 mm, 36 W	no	60		
E2	Light switch, 1-lever, 1-way	no	90		
SECTION: SMALL POWER					
F1	Double switched socket outlet, 16 A	no	38		
F2	Data outlet, Cat 6, double	no	25		
SECTION: EARTHING AND TESTING					
G1	Testing, commissioning and certificate of compliance	sum	1		
G2	As-built drawings and operating manuals	item	1
