TENDER DOCUMENT

RIV/ELEC/2026/036

Supply and installation of electrical works at Rivermead Primary School

Employer: Rivermead Local Municipality

Synthetic test document - fictional data

Part C1: Tender notice and conditions

The scope of work covers the main hall, the offices, the passages and the external areas. The main hall seats about two hundred people and the adjoining rooms are used as classrooms and offices. Rivermead Primary School is a single-storey brick building constructed in 1987 and extended in 2004.

The area has a mild climate and rainfall is mostly in the summer months. The roof is covered with fibre cement sheeting supported on steel trusses. Rivermead Primary School is a single-storey brick building constructed in 1987 and extended in 2004.

Existing luminaires in the hall are fluorescent fittings that have reached the end of their service life. The kitchen, ablution blocks and storeroom are located on the eastern side of the building. The municipality has operated the facility since 1996 and the local committee manages bookings.

3.2 Only tenderers registered with the Construction Industry Development Board with a contractor grading of 3EP or higher in the electrical engineering works category may submit tenders.

A previous renovation replaced the plumbing and the ceiling in the main hall. Parking for site vehicles is available at the rear of the property near the service entrance. Rivermead Primary School is a single-storey brick building constructed in 1987 and extended in 2004. Most of the existing wiring is concealed in the ceiling void and the roof space is accessible through two hatches. Electricity is supplied through a metered connection from the municipal network.

The external areas include a paved forecourt, a small garden and a covered walkway. The surrounding properties are residential and the nearest shop is a few hundred metres away. Rivermead Primary School is a single-storey brick building constructed in 1987 and extended in 2004. The community committee reports that the building is busiest on weekday evenings and on Saturdays. The tender documents consist of the invitation, the conditions of tender, the scope of work and the pricing schedule.

Rivermead Primary School is a single-storey brick building constructed in 1987 and extended in 2004. The municipality has operated the facility since 1996 and the local committee manages bookings. The kitchen, ablution blocks and storeroom are located on the eastern side of the building. The site is fenced and has a single vehicle gate on the northern boundary.

The surrounding properties are residential and the nearest shop is a few hundred metres away. The scope of work covers the main hall, the offices, the passages and the external areas. Most of the existing wiring is concealed in the ceiling void and the roof space is accessible through two hatches. The roof is covered with fibre cement sheeting supported on steel trusses.

The surrounding properties are residential and the nearest shop is a few hundred metres away. Parking for site vehicles is available at the rear of the property near the service entrance. The community committee reports that the building is busiest on weekday evenings and on Saturdays.

3.6 Tenderers must complete the declaration of interest and the declaration of past supply chain management practices.

Existing luminaires in the hall are fluorescent fittings that have reached the end of their service life. The municipality has operated the facility since 1996 and the local committee manages bookings. Materials for the project are available from suppliers in the district and from the nearest regional centre. The main hall seats about two hundred people and the adjoining rooms are used as classrooms and offices. The building is located in Rivermead and is used throughout the week by community groups.

The external areas include a paved forecourt, a small garden and a covered walkway. The existing electrical installation consists of a main board in the plant room and three sub boards. Existing luminaires in the hall are fluorescent fittings that have reached the end of their service life.

The tender documents consist of the invitation, the conditions of tender, the scope of work and the pricing schedule. A previous renovation replaced the plumbing and the ceiling in the main hall. The employer's agent has prepared the specifications in accordance with standard industry practice. The building is located in Rivermead and is used throughout the week by community groups. The roof is covered with fibre cement sheeting supported on steel trusses.

The employer's agent has prepared the specifications in accordance with standard industry practice. The external areas include a paved forecourt, a small garden and a covered walkway. The tender documents consist of the invitation, the conditions of tender, the scope of work and the pricing schedule. The building is located in Rivermead and is used throughout the week by community groups.

3.3 Tenderers must submit a valid tax compliance status pin issued by the South African Revenue Service.

The external areas include a paved forecourt, a small garden and a covered walkway. The community committee reports that the building is busiest on weekday evenings and on Saturdays. The tender documents consist of the invitation, the conditions of tender, the scope of work and the pricing schedule.

The building was valued at R12 million in the municipality's last asset register. Parking for site vehicles is available at the rear of the property near the service entrance. Rivermead Primary School is a single-storey brick building constructed in 1987 and extended in 2004.

The building is located in Rivermead and is used throughout the week by community groups. The tender documents consist of the invitation, the conditions of tender, the scope of work and the pricing schedule. The area has a mild climate and rainfall is mostly in the summer months. Existing luminaires in the hall are fluorescent fittings that have reached the end of their service life. The site is fenced and has a single vehicle gate on the northern boundary.

Drawings of the existing layout have been prepared by the employer's agent and are available for inspection. Existing luminaires in the hall are fluorescent fittings that have reached the end of their service life. The site is fenced and has a single vehicle gate on the northern boundary. The area has a mild climate and rainfall is mostly in the summer months. The existing electrical installation consists of a main board in the plant room and three sub boards.

Existing luminaires in the hall are fluorescent fittings that have reached the end of their service life. The kitchen, ablution blocks and storeroom are located on the eastern side of the building. The tender documents consist of the invitation, the conditions of tender, the scope of work and the pricing schedule. Part C3 describes the extent of the works and the standard of workmanship expected in general terms. The surrounding properties are residential and the nearest shop is a few hundred metres away.

The facility is required to keep a register of all electrical faults reported by the caretaker. Existing luminaires in the hall are fluorescent fittings that have reached the end of their service life. The works are located on erf 1042 and the title deed is held by the municipality.

The main hall seats about two hundred people and the adjoining rooms are used as classrooms and offices. The works are located on erf 1042 and the title deed is held by the municipality. The external areas include a paved forecourt, a small garden and a covered walkway. The scope of work covers the main hall, the offices, the passages and the external areas.
